

STATISTICS OF LANGUAGES THEORIES AND EXPERIMENTS

An Interdisciplinary Workshop

Warsaw, Poland, 19th-22nd July 2017

<http://statlang2017.ipipan.waw.pl/>

Sponsored by

SAMSUNG

The aim of the workshop is to gather some interdisciplinary researchers interested in both theoretical and experimental aspects of statistical laws of human language and similar digital systems (music, DNA, computer programs, animal communication). We would like to foster stronger connections between empirical computational studies and theoretical mathematical models. In particular, we would like to raise mutual awareness of investigations in these fields done by scholars of various sciences.

Invited speakers:

- Eduardo G. Altmann (University of Sydney)
- Christian Bentz (University of Tübingen)
- Damian Blasi (Max Planck Institute for Mathematics in the Sciences)
- Giampaolo Cristadoro (University of Bologna)
- Alvaro Corral (Centre de Recerca Matemàtica)
- Łukasz Dębowski (Polish Academy of Sciences)
- Ramon Ferrer-i-Cancho (Universitat Politècnica de Catalunya)
- Francesc Font-Clos (ISI Foundation)
- Martin Gerlach (Northwestern University)
- Estate Khmaladze (Victoria University of Wellington)
- Fermín Moscoso del Prado (University of California Santa Barbara)
- Urszula Oleszek (Samsung Electronics Polska)
- Stuart Semple (University of Roehampton)
- Isabel Serra (Centre de Recerca Matemàtica)
- Kumiko Tanaka-Ishii (University of Tokyo)
